

Jack Simm

Product Designer/ Product Development Manager

An experienced time served Mechanical Maintenance Technician with a proven track record in manufacturing. I have over a half-decade of manufacturing experience at Unipres UK, working in key departments, which has allowed me to grow as an individual and influenced my attitude to teamwork, training, communication, and being a customer-centric employee that adds value to the production process. It has also aided my development in respect to being able to embrace the opportunity to solve problems and meet the customers' expectations in the delivery of a compliant manufactured product to specification. In relation to my behaviors and values I promote a strong result focused approach, a professional attitude with trust, respect, integrity and honesty at its core. Through utilising these strengths and qualities, I believe I am equipped with the experience to assist the business in its drive to optimise value, be successful and deliver a world class product/service that matches the customers' expectations.
